

## The Austrian Army.

Austria, no less than France and Germany, is now feverishly preparing her forces for an impending struggle in which she must feel that not merely the integrity of a portion of her territory, but probably her existence as a nation, is at stake. Over the Galician frontier she sees the heavy storm-clouds thickly gathering and the far horizon bristling with Cossack lances. All questions of internal politics have therefore been laid aside, and the approaching danger engrosses the entire attention of both Cisleithanian and Transleithanian legislatures. During the past week alone a large sum has been voted by the Hungarian Diet for increasing the strength of the Landwehr and Landsturm. During the coming one a similar measure may pass the Reichsrath. In short, the Austrian Empire intends to meet the emergency prepared to the full extent of her resources.

Before touching upon her military and naval strength, it might be well to explain in a few words as possible the exact relationship to one another of the two component parts of this great dual monarchy. In 1867 the Empire was divided into Cisleithania (consisting of the German provinces of the Empire, as well as Galicia, Dalmatia and Bohemia), and Transleithania, including Hungary, Croatia and Slavonia. Each section, while being equally subordinate to the scepter of the Hapsburgs, has its own National representation, and only on the question of the regular army and of Austria's relations with foreign powers are the two halves of the Empire a unit. Both countries even control their own Landwehr, so that in treating of Austria's military forces we have to consider three entirely separate elements: First, the regular army; secondly, the Landwehr of Cisleithania, and, thirdly, the Honved army or Transleithanian Landwehr.

As in the majority of Continental countries, military service in Austria is made general and compulsory by law. Every citizen having reached the age of twenty comes within its provisions and remains subject to it during twelve years—three years in the standing army, seven in the reserve and two in the Landwehr. On a war footing the combined armies of the Empire number no less than 1,276,000 men, of which 872,000 belong to the regular army, including reserve, 310,000 to the Landwehr, both monarchies furnishing about an equal share, and 94,000 are reserve on the recruiting lists. A military law passed in 1882 created still another reserve force, called the Landsturm, but so far its effectiveness has not been accurately ascertained. It comprises men from the age of thirty-two to forty.

The Austrian army is divided into fifteen army corps, and stands under the orders of the Emperor Francis Joseph as the supreme chief of the land and naval forces of the Empire. The Emperor transacts his military business through the intermediary of the "Military Chancellerie," or Bureau, directed at present by General von Popp. It is through this channel that he communicates with the three Ministers of National Defense (Landesverteidigung), or, in other words, with the Cisleithanian Landwehr, Commander, Archduke Rainer; the Transleithanian Landwehr, Commander, Archduke Joseph; and the Minister of War, properly called Count Bylandt-Ribeydt. The latter, in conjunction with the Inspector-General of the Army, the Archduke Albert, constitutes the head and brains of the Austrian army. The Archduke, who is the Emperor's uncle, can boast of being the only Austrian General with a victory to his credit. It was a brilliant one, nevertheless, and will be inscribed in golden letters on the pages of Austrian history. Who among the older readers of *The World* but will remember the news of the Battle of Custoza, nearly twenty-one years ago, when Victor Emmanuel's large army was put to ignominious flight by the Archduke's greatly inferior force? But such is the grim irony of fate that neither this brilliant triumph nor the equally glorious victory of Lissa saved Austria from losing her Venetian provinces in that fateful year of 1866.

The Austrian general staff also stands under the direct orders of the Emperor. Its present chief is Field Marshal Lieutenant von Beck, a native of the Duchy of Baden, with a brother serving in the German army. He is assisted by General von Herneck. The officers of the general staff are distributed among the higher commands of the army and partially engaged in the development of military services in the general bureau. There is also a general staff for the artillery and engineering branches.

The grades in the Austrian army, beginning with the non-commissioned officers, are as follows: Corporal, or Corporal; Zugführer, or platoon leader; Fenerwerker, or Sergeant Major, and Cadet-Offizier Stellvertreter, or officer's substitute. To attain the last-named grade an examination at the Cadetten-Schule is necessary. There are sixteen such institutions in Austria. The commissioned officers' grades are identical the same as in the army of the United States. The higher officers are the General-Major, the equivalent of Brigadier-General; the Feldmarschall-Lieutenant, or General of a Division; the Feldzeugmeister, or General of a Corps d'Armée, and lastly the Field Marshal. Archduke Albert is the only officer of this grade at present.

The standing army is composed of 102 regiments of the line. Each regiment carries, in addition to its number, the name of its "proprietary colonel." This is an entirely honorary title, given by the Emperor to foreign princes or important persons

ages in general. Some regiments have even two proprietary colonels—the first a foreigner, the second some Austrian military celebrity. Other regiments have preserved the names of proprietary colonels who distinguished themselves in former campaigns. The "crack" Viennese regiment—the Fourth Infantry—has been called since its creation in 1696 the Hoch-und Deutschmeister (Grand Master of the German Knights), and is held as high in popular estimation in the Kaiserstadt as the Preobrajen ski is in St. Petersburg, the Grenadier Guards Regiment in London and the "Gallant Seventh" of New York.

Some changes have been introduced in the Austrian infantry uniform since the war of 1866. It was found that the snow-white tunic, in conjunction with the light blue trousers, offered too clear a target to the enemy's marksmen, and the white was replaced with dark blue. The Jaeger, or sharpshooter, now wears a gray tunic, and a broad brimmed hat from which fall an avalanche of roosters' feathers. The Tyrolean carabineers are also very picturesque, with their brown-blue tunics and their pheasant-feathered coquard. A peculiarity of the Hungarian Honved infantry is the close fit of their trousers, having the appearance of theatre "tights." And Austrian cavalry is the most brilliant arm of the Austrian army, and the one of which the nation is most justly proud. There are fourteen regiments of dragoons recruited mainly in Bohemia and the German provinces of the empire, eleven regiments of Uhlans recruited in Galicia and Croatia and sixteen regiments of Hussars from Hungary and Transylvania.

The Austrian cavalryman is the most dandified soldier in Europe. Even the English Life Guardsman cannot approach him in that respect. Watch the cavalry officer on his promenade through the streets of Vienna on fine mornings, an eye-glass in his eye and a dainty cane in his right hand, and one would swear that he is more sportsman than soldier. And this conclusion would be a just one. He is ever ready to mortgage his very soul to raise the stakes for a bet. The uniforms of the Austrian cavalry present a variety of colors to be found in no other army, red, blue, brown and yellow being the prevailing ones. The Royal Hungarian Guard, resplendent in scarlet, silver and leopard skins, are unsurpassed for beauty and martial appearance. The artillery, which in war time numbers over two hundred batteries, is uniformed in maroon brown. The infantry and cavalry have for years been armed with the Wemdl rifle, but the Government, alive to the necessities of the situation, has now issued large orders for the manufacture of magazine guns, and by next May the whole army will be provided with them.

Though small in the number of its vessels, the Austrian navy would play no inactive part in a war with Russia. Should Turkey also enter the arena against the latter country we might hear of the Tothoff, Lissa and Ferdinand Max, the three leading Austrian men-of-war, demolishing Russian forts on the Black Sea coast. The full force of the Austrian navy is eight ironclad men-of-war, aggregating 42,900 tons, three ironclad frigates of 13,390 tons, and a number of smaller crafts, including monitors and torpedo-boats. At the head of the fleet, acting in the double capacity of Marine Minister and Vice-Admiral, stands Baron Max von Sterneck, who, as commander of the Ferdinand Max, rammed and sunk the Italian flagship *Re d'Italia* at the celebrated sea fight of Lissa, in 1866, thereby deciding the victory in favor of Austria.

In spite of her well-disciplined army and abundance of war material the outlook on the whole seems far from encouraging to the Austrian Empire. The same causes that led to her numerous defeats in past times continue to exist at the present day and may bring about further misfortune. Though the Hungarians have fought "on the cruelties of Hayman in 1848, while still remembering Villages and Russian interference, and is now making common cause with his German brother in the maintenance of Austria's integrity, there are many symptoms of discontent among the Slavs of the Empire. Who knows but the Russian influence—Russian intrigues, some people call it, may have worked irreparable mischief in Bohemia, Croatia, Dalmatia and the other Slavonic sections? At all events that essential condition of security against outward foes, internal unity, is sadly lacking in the land of the Hapsburgs, and the Czar Nicholas's celebrated reference to Turkey as the "sick man" might as truthfully be applied to her.

1145 1y

THE EQUITABLE  
Life Assurance Society  
—OF THE UNITED STATES—  
120 Broadway, New York.  
(ESTABLISHED IN 1859.)

Issues Policies on all the best Plans, among which are to be found many new departures, containing features not yet in use in other companies, aiming to the comfort and security of the POLICY HOLDERS.

This Company may be safely called the Pioneer in most of the important insurance reforms, and for this reason as well as many others, it now transacts the largest yearly business done by any one company in the world. Policies are both  
NON-FORFEITABLE AND INDISPUTABLE.

Assets, January 1, 1886 : : \$68,380,187.00  
Liabilities, 4 per cent. valuation : : \$2,891,148.97  
SURPLUS : : \$65,489,038.03

(SURPLUS ON N. Y. Standard 4 1/2 per cent. interest, \$17,495,329.40.)  
Surplus over Liabilities, on every standard of valuation, larger than that of any other life insurance company.  
New Assurance in 1885 : : \$4,011,378.00  
OUTSTANDING ASSURANCE : : \$37,338,246.00  
Total paid Policyholders in 1885 : : 7,138,689.05  
Paid Policyholders since organization : : 88,211,175.63  
Income : : \$6,590,053.13

EVERY POLICY BECOMES INVESTIBLE  
As soon as it has been three years in force, and it is a part of the written agreement that every investible policy shall be paid, without rebate of interest, immediately upon the receipt by the Society of satisfactory proofs of death.

Of 1,047 death claims, amounting to \$3,943,892, paid in 1886.  
625 were paid the very day proofs were received; amount, \$1,298,250.  
721 were paid within 8 days after receipt; amount, \$657,789.  
503 within 10 days; amount, \$5,017,799.  
1,000 within 60 days; amount, \$7,701,442.  
40 after 90 days; amount, \$181,390.

No other Company can show a Record for Promptness approaching that of the EQUITABLE.

Even the brief delays indicated above, were owing to the failure of claimants, chiefly at remote points, to furnish promptly the requisite legal release, and not to any lack of promptness on the part of the Society.

CONTESTED CLAIMS—NONE.  
The Society issues a plain and simple contract of Assurance, free from hard words and technical conditions. NON-FORFEITABLE AND INDISPUTABLE after three years.

All Policies as soon as they become investible are repaid IMMEDIATELY upon the receipt of satisfactory proofs of death, and without the delay of sixty or ninety days, usual with other companies.

For pamphlets or full particulars, apply to  
ALEX. J. CARTWRIGHT  
1124 1y Agent, Hawaiian Islands.

## Insurance Notices.

# Equitable Life Assurance Society OF THE UNITED STATES.

From the beginning, the Equitable has been the pioneer in all reforms affecting the security, convenience, and advantage of policy holders. It was the first company to issue incontestable policies; the first to make such policies payable immediately, instead of after the delay of a stipulated number of months; the first to simplify the policy contract, and remove from the business technical and confusing complications; the first to apply the Tontine principle to life assurance; the first to issue a policy guaranteeing the payment of the entire reserve and a full share of the accumulated profits to each policy holder at the end of a stipulated period the first to introduce the Semi-Tontine policy, which, in addition to all the ultimate advantages secured under the Tontine system, is "non-forfeiting," and has a surrender value during its earlier years.

During the twenty-six years and a half of its history, it has written \$105,000,000 more of assurance than any other company during the same period.

No other company has approached the Equitable in the success achieved and surplus accumulated, and the results of management in the past furnish the best guarantee for the future, to intending assurers.

Assets, January 1, 1886 : : \$ 66,553,387.50  
Liabilities, 4 per cent. valuation : : 52,691,148.37

Surplus : : \$ 13,862,239.13  
(Surplus on N. Y. Standard 4 1/2 per cent. interest, \$ 17,495,329.40.)  
New Assurance in 1885 : : \$ 96,011,378.00  
Outstanding Assurance : : 357,338,246.00  
Total Paid Policyholders in 1885 : : 7,138,689.05  
Paid Policyholders since organization : : 88,211,175.63  
Income : : 16,590,053.13

Insurance issued on all approved plans.

Alex. J. Cartwright,  
General Agent for Hawaiian Islands.

FRED. PHILP, C. BREWER & CO.  
Successor to Peter Dalton.

SADDLE & HARNESS  
MANUFACTURER,  
92 KING STREET, HONOLULU
